Trumpet Mute Order Form

The Straight Mute is a musical device that fits inside a trumpet bell in order to change the color of the sound. This year, all 7<sup>th</sup> and 8<sup>th</sup> grade trumpet players are required to own a straight mute for use in literature where it is called for. There are many kinds of straight mutes available, but some are considered "standard." There are two below that I prefer in my own playing. You only need to order one.

"Good"  
Humes and Berg 101 Straight Mute (Fiber).....\$12.00  
-Softer sound, inexpensive

"Better"  
Denis Wick Straight Mute (Aluminum).....\$32.00  
-Brighter, sizzling sound, rugged
